Greetings!

I am back in Kenya and excited to spend Mother's Day with our amazing WEEP mothers and staff. Professor Colleen Fisher, PhD is here doing research on our WEEP program. She is able to demonstrate the impact of our work with these women and children and will be soon publishing her results!

With funding, through Women's Equality Empowerment Project (WEEP) the lives of these families receive the opportunity to be transformed. HEART provides the critical services, of food/nutrition, access to medical care, shelter, skills development and education.

See Judith and her children pictured below.

Judith is one of the twelve newly enrolled mothers at Kibera Bowman WEEP Center!

The impact of WEEP is beautifully captured in the short film, "Flicker of Hope". It is also now available online at www.sponsoramom.com. If you haven't seen it, please watch it. If you have seen it, please watch it again. Please share it with others on social media, by email, and in person. Thank you for being a part of this amazing story of transforming the lives of HIV positive mothers and their children in Kenya.

If you are able to help support a Kenyan mom and her children, please call Toni in our California office (530) 885-9600 to assist you, give online at www.africaheart.com or mail a check to HEART P.O. Box 5675 Auburn, CA 95604. I realize that not everyone that receives will be in the position to provide financial support at this time. If this is the case for you, I simply ask that you add these families to your ongoing prayers and share the story of the incredible WEEP ladies..

Forever Grateful,

Vickie Winkler
